

New Support for Agencies Seeking IT Acquisitions for COVID-19 Response

Did you know you can get quick support on IT acquisitions to respond to COVID-19? **Local, state, and federal agencies** can now use a streamlined agreement to partner with acquisition specialists when consulting at or under your agency's purchase card limit. **Contact us at 18FCrisisSupport@gsa.gov to learn more.**

Who we are

We are [18F](#), a team within the General Services Administration (GSA). We are federal employees with deep expertise in IT acquisitions and modular contracting — breaking up large, complex projects into smaller, tightly-scoped procurements to mitigate risk, and encourage the delivery of working software to users more rapidly. We're here to help expedite your acquisition process so you can more rapidly respond to critical COVID-19 needs.

What we offer

- **“Phone-a-friend” advice.** We can consult on your acquisition plan and sourcing strategy, including guiding you through emergency acquisition provisions.
- **Draft procurement documents** on your behalf or **quickly review your drafts.**
- **Provide technical evaluation assistance** during the vendor evaluation process (including staffing a Technical Evaluation Panel) to ensure vendors are qualified to do the work you need them to do.

We look forward to connecting with you!

Contact us at 18FCrisisSupport@gsa.gov to get started.
